SUMMARY

Full Stack Engineer with 3+ years building production systems in TypeScript, React, Node.js, and AWS. Reduced internal search latency by 90% at Sherwin-Williams and delivered a secure, multi-region customer support platform at CARD.com supporting real financial transaction workflows. Experienced shipping AI-powered applications using LangChain, RAG, and OpenAI. Looking for a role with ownership, strong engineering culture, and real user impact.

SKILLS

Languages: TypeScript, JavaScript, Python, Java, SQL

Frontend: React, React Native, Next.js, Tailwind CSS, Mantine, Vite, TanStack (Query, Router, Table)

Backend: Node.js, Express, tRPC, Flask, REST APIs, GraphQL, WebSockets, Zod

Cloud & DevOps: AWS (CDK, App Runner, S3, CloudFront, Cognito, WAF, CodePipeline), Docker, CI/CD, Vercel

Databases: PostgreSQL, MySQL, MongoDB, NoSQL, Geospatial Indexing

AI/ML: LangChain, LangSmith, OpenAI API, RAG, Vector Stores, LLM Integration

EXPERIENCE

Full Stack Engineer | CARD.com

Feb 2025 – Feb 2026 | Remote

Fintech platform providing prepaid cards and flexible money management.

- Built ACE, a full-stack internal support platform (React, TypeScript, Node.js, tRPC, AWS) that unified Ringmaster, Fusion, and AWS data sources into a single agent-facing interface, reducing context-switching across support workflows.
- Implemented role-based access control (Agent, Manager, Admin) with PII masking for SSNs, AWS Cognito/Amplify authentication, and custom session management to meet compliance requirements.
- Deployed cloud-native infrastructure on AWS using App Runner, S3, CloudFront, WAF, and CodePipeline across multi-region architecture for high availability.
- Integrated Plaid and Pinwheel APIs to automate recurring payment transfers, reducing manual bill migration effort for customers.
- Led code reviews and architectural discussions to maintain delivery quality and team velocity.

Full Stack Engineer | Sherwin-Williams

Feb 2024 – Feb 2025 | Cleveland, OH (Hybrid)

Leading global paint and coatings company with digital tools for professionals and retail customers.

- Optimized internal search tool performance by 90%, directly increasing operational efficiency for daily users across the organization.
- Built a full-stack price quote tool using React, Node.js, Java, and SQL that allowed users to estimate paint costs in real time, improving sales conversion through faster quote generation.
- Collaborated with cross-functional teams to ship user-centric, scalable applications and created technical documentation to improve usability and onboarding.

Software Developer | Walla Walla University

Sep 2022 – Jun 2023 | Walla Walla, WA

- Directed backend development for a production web application, designing scalable RESTful APIs and core business logic for classroom management systems.
- Designed and bootstrapped MySQL database schemas, improving query performance and data integrity for academic and administrative services.
- Integrated frontend interfaces with backend services in close collaboration with frontend developers.

PROJECTS

Maple Routes

Apr 2026 – Present

React, Node.js, TypeScript, MongoDB, Geospatial APIs

- Geospatial web app that generates safety-aware dog walking routes by analyzing real-time hazard reports and nearby dog-friendly locations (parks, cafés, pet-friendly stores).
- Built with geospatial indexing for efficient location queries and dynamic map overlays showing route risk levels and points of interest.

Repository Augur

Mar 2026 – Apr 2026

React, Flask, TypeScript, Python, MongoDB, LangChain, OpenAI

- AI-powered chatbot allowing users to interact with GitHub repositories via natural language; uses RAG with MongoDB vector store to answer questions about repo content.
- Implemented GitHub OAuth authentication, real-time chat via WebSockets, and Stripe integration for paid access.

Hypixel Bedwars Stats Dashboard

Mar 2026

Next.js, TypeScript, HeroUI, Vercel

- Real-time stats dashboard integrating the Hypixel API; deployed on Vercel with CI/CD. Live at bed-wars-stats-dashboard.vercel.app.

EDUCATION

B.S. Computer Science & Business Administration

Jun 2023

Walla Walla University • GPA: 3.4 • Walla Walla, WA

CERTIFICATIONS

Foundation: Introduction to LangChain (Python) — LangChain, Mar 2025

API Security for PCI Compliance — APIsec University, Oct 2023
